## SUMMARY

Product Designer with 4 years of experience designing complex B2B SaaS products, turning dense, data-heavy flows into clear and usable interfaces. Skilled at the full design process — research, prototyping, and usability testing — and comfortable working closely with product and engineering, with a solid understanding of front-end constraints. I integrate AI-assisted tools into my daily workflow to move faster without losing rigor.

## EXPERIENCE

### Freightos

*May 2022 - March 2026*

Product Designer — *Feb 2025 - March 2026*

- Spearheaded the redesign of core booking and quoting flows, simplifying complex logistics data for global carriers and shippers.
- Directly collaborated with key partners including Qatar Airways, Roche, and Nippon Express to deliver high-stakes B2B digital solutions.
- Bridged the gap between product and engineering, transforming complex technical specs into intuitive prototypes while working in tight sync with PMs and QA.
- Optimized design-to-development handoff in an Agile environment, managing multiple workstreams and reducing friction in iterative release cycles.
- Integrated AI-assisted tools (Claude, Claude Code, v0 by Vercel) into the design workflow to build functional prototypes and speed up design-to-dev handoff, working comfortably with front-end constraints (HTML, CSS).

Junior UX/UI Designer — *Dec 2022 - Feb 2025*

- Owned the end-to-end design of specific features within the booking platform, ensuring visual consistency and usability across the ecosystem.
- Contributed to the evolution of the Design System, creating and documenting reusable components used across multiple product areas to improve consistency and design-to-dev efficiency.
- Conducted usability testing and user research to identify friction points, translating insights into actionable UI improvements.
- Collaborated daily with engineering squads to ensure high-quality implementation of designs and resolve technical constraints during development.

UX/UI Intern — *May 2022 - Dec 2022*

- Supported the senior design team in creating high-fidelity prototypes and UI assets for the Freightos marketplace.
- Assisted in the maintenance of the UI library, ensuring all components followed brand guidelines and accessibility standards.
- Performed competitive benchmarking and industry research to provide data-driven foundations for new product concepts.

## SKILLS

**Product:** Product design, UX design, design systems, information architecture, data visualization, data analysis, user research, user testing, wireframing, prototyping, A/B testing, cross-functional collaboration, stakeholder management, AI workflows.

**Tools:** Figma, Slack, FigJam, v0 by Vercel, Claude.

**Languages:** Spanish (native), English (fluent), Catalan.

## EDUCATION

***Master's Degree in Design and Management of User Experience and Digital Services***
ELISAVA — 2021 - 2022

***Design Degree***
La Laguna University — 2017 - 2021

***AI Masterclass for Designers, Perception and Memory in HCI and UX***
The Interaction Design Foundation — 2022

## AWARDS

- Double Nominee (ADG Laus & Elisava Master Awards) for the 'SWAP' project, recognizing excellence in design and innovation (2022-2023).
- Published Case Study: COVID-19 signage system for public transport, featured by the University of La Laguna (2021).
